

ACT REPORT

WE ^{ONLY} RATED DOGS®

PHOTO COURTESY @LUNETHEDAL ON INSTAGRAM

Haha very funny guys. Sending in photos without dogs in them. Thought I just wouldn't notice? Hilarious.

Still 12/10 for the blanket

Unbelievable. We only rate dogs. This is clearly a Nervous House Rhino. Please pay attention to what you're sending in. Thank you . . .

13/10

Introduction

Raw data when collected does not always come clean. The data I will be analyzing in this report is the tweet archive of Twitter user WeRateDogs® with user ID @dog_rates.

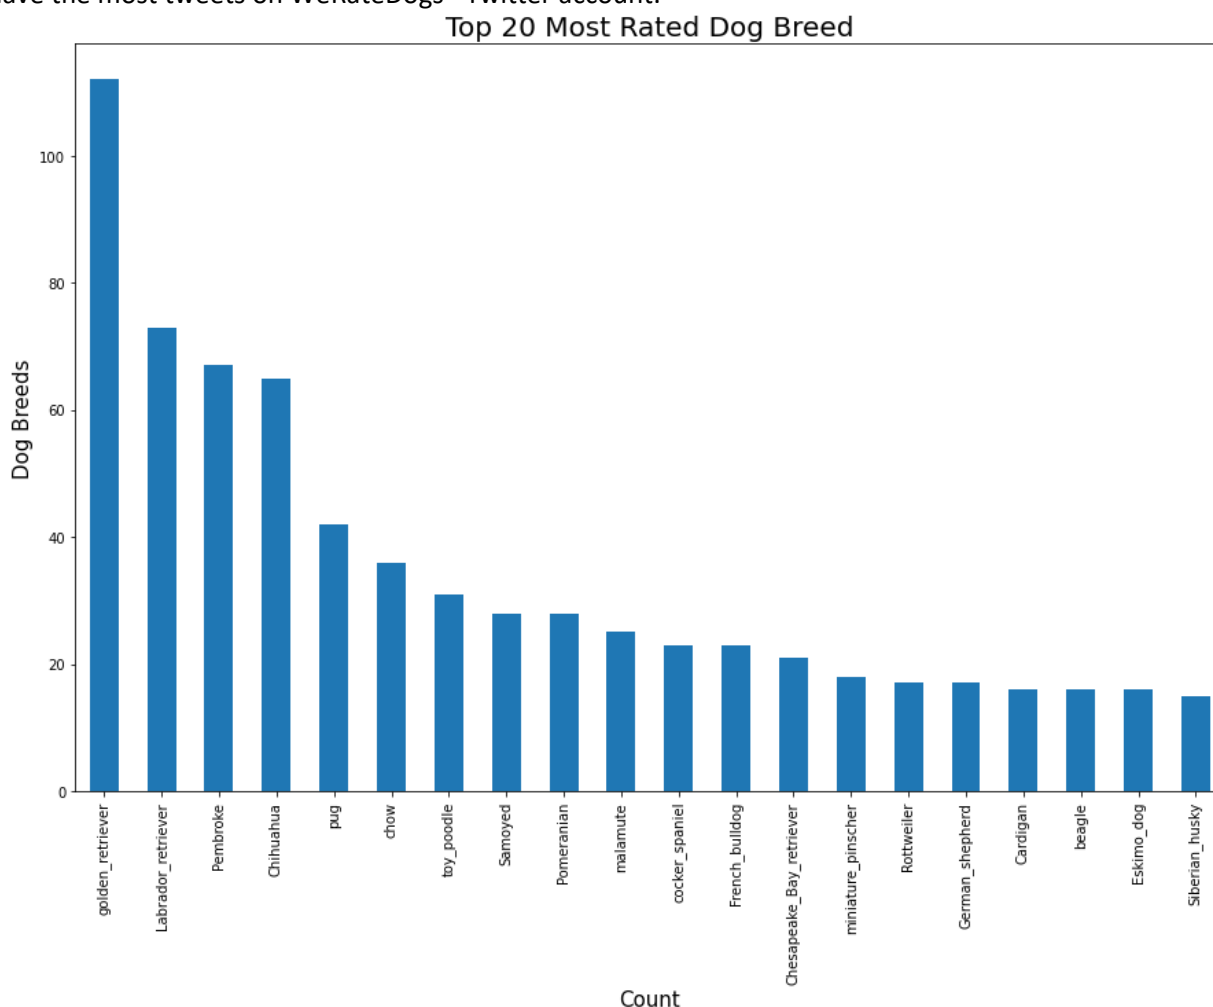

WeRateDogs® is a Twitter account that shares and rates dogs pictures, with a humorous comment about the dog. The dog ratings system is on a denominator of 10 and a numerator that is from 0 to a maximum of 15. The Twitter account of WeRateDogs® as at the time writing have 9.3 million followers and the account have received several international media recognitions.

Analysis Report

The tweet archive of WeRateDogs® was analyzed for the following questions.

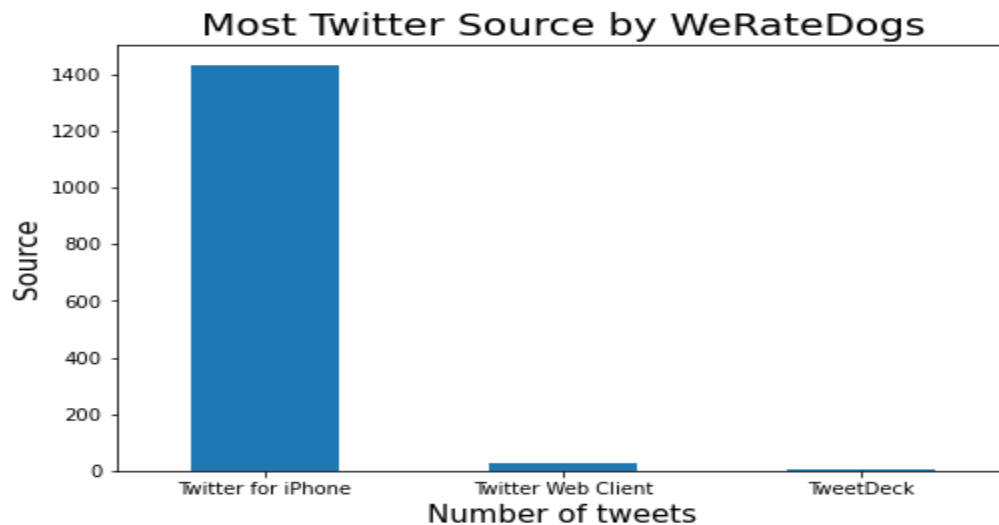

1. Most popular Dog Breeds

The most popular dog breed in Golden Retriever followed by Labrador Retriever. Maybe these retriever dogs are popular because they help human retrieve things? I don't know. However, these dog breeds have the most tweets on WeRateDogs® Twitter account.

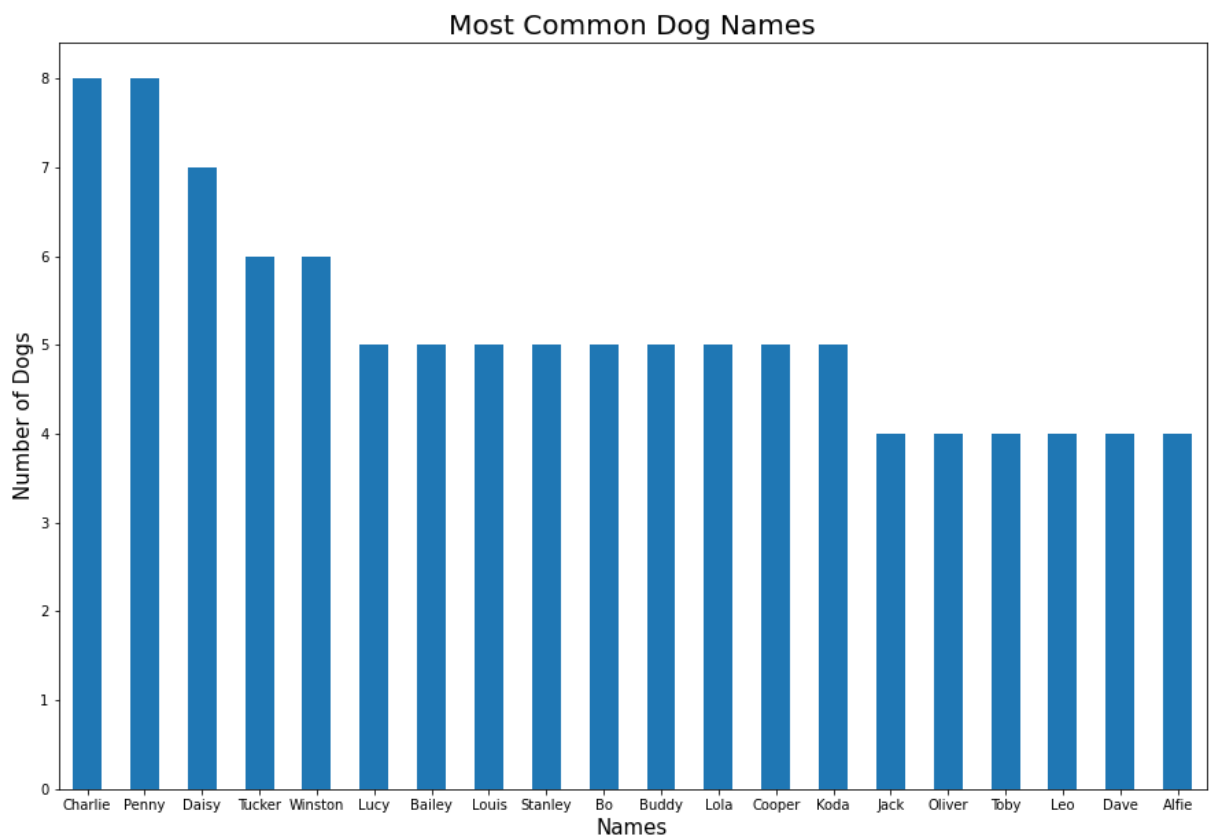

2. Most used Twitter source for tweeting

It is not a surprise that Twitter for iPhone is the most used source for posting on WeRateDogs® Twitter account followed by Twitter Web Client which posted less than 3% of the total tweets in our analysis.

3. Popular Dog Names

The most common dog names in our analysis are Charlie and Penny, both appearing 8 times followed by Daisy which appeared 7 times, Tucker and Winston (6), then 9 names appeared 5 times in the list also.

4. Correlation between Retweet, Favorites and Ratings

I tried to find the correlation on how the WeRateDogs® dog Ratings affects how people Retweet and Favorite the tweet using a Correlation plot. I generated a Seaborn Heatmap using the correlation data.

My findings are that there is no relationship between the Retweet counts and Favorite counts with the Dog ratings. However, there is a strong correlation between Retweet counts and Favorite counts.
